18" width for adults
20" width for larger adults

Made in Canada by
**DB PERKS &
ASSOCIATES LTD.**

BUILT FOR AQUATIC CENTRES

The Aquatic Stainless Steel Wheelchair is fabricated 100% in materials compatible with swimming pool environment. Upholstery fabric, chosen for aquatic centre needs, is a PVC mesh material that is both anti-mildew and anti-fungal. Stainless steel components are 304 & 316 grade, plastics are good quality; this chair is suitable for daily immersion in pool water.

VERSATILE DESIGN

Thoughtful features include: frame tubing that is bent in a radius to eliminate sharp corners, wheels front and back are tough plastic 'mag' wheels with non-pneumatic tires eliminating the need to maintain air pressure, swing-away style arm rests accommodate transfers and fold up foot rests are removable, giving the chair lots of versatility. Chair is supplied with nylon seat belts and chest straps.

This chair uses a heavy duty frame that is double cross braced to achieve a 350 lb rating. Wheel locks are low mounted in traditional position for chair user. The folding cross brace design makes chair easy to store where space is limited.

BEST WARRANTY

The Stainless Steel Aquatic Wheelchair is supported by a five year manufacturers warranty and a complete inventory of parts are on hand to keep your chair in top operating condition down the road. The chair is supplied with an operators manual, complete with parts lists, care information and user guide.
