## Aquatic Wheel Chair (Stainless Steel)

Our aquatic wheelchair is designed for use in shower areas on the deck and even in the pool. It works with a lift or a ramp to provide facility access from the change room to pool deck and back. An aquatic wheelchair eliminates one more barrier for use of aquatic centres.

### USERS APPRECIATE

The wheelchair is most similar in style and function to a traditional wheelchair.

### OPERATORS APPRECIATE

The low maintenance design and durability.

All chairs are fabricated from materials 100% compatible with swimming pool water. These chairs are suitable for daily immersion in swimming pool water.

The heavy-duty Aquatic Wheelchair is rated at 350 lbs. using a double cross braced stainless steel frame. The 24" wheel chair is rated for 500 lbs. Thoughtful features include: frame tubing that is bent in a radius to eliminate sharp corners and wheels (both front and back) are tough plastic 'mag' style wheels with non-pneumatic tires to eliminate maintenance.

Upholstery fabric is a mesh material treated to be both anti-fungal and anti-mildew. Arm rests swing up out of the way for transfers and footrests will fold up or can be removed for versatility. Chair is supplied with upper chest strap and lower nylon seat belts.

Order in one of three seat widths - 16" youth, 18" adult or 20 " large adult
