

6 DECK EQUIPMENT

Note: Diving boards are sold separately from stands & are not included in stand prices.

Durafirm Short Stands

Durafirm short stands are designed for installation on concrete platforms typically built at the pool by your contractor. The short stand is suitable for one meter or three meter platforms. Railing configuration will depend on railings built on the platform. Short stands can be supplied with no railings, railing one side only or both sides as required for your application.

Fulcrum units identical to the one and three meter stands and they use a six-point anchor pattern. Anchors included. **FOB Factory**

Item No	Description	Price
16 10 03	Short Stand - 2 rails, 2 sides	\$10,988.25
16 10 04	Short Stand, no rails	\$6436.88

Durafirm Diving Stands

Durafirm stands are fabricated from cast aluminium (frame) and stainless steel (railings); both materials stand up to institutional use very well.

The most important single feature of Durafirm stands is the simple 8-point deck anchorage, which requires no special footings and can be installed on an existing deck, if concrete is of good quality and no less than 4½" thick. This is the easiest stand to install in a retrofit situation on an existing deck.

Both one and three meter stands have hinged board anchors which allow easy tilting of the board up to 180° to clear the pool edge during other activities such as swim meets and water polo matches.

All stands are supplied with double guardrails.

Durafirm stands are manufactured in different heights to accommodate pools with deck to water level dimensions from 1" to 13". Deck to water level dimension of the pool must be indicated when ordering. **FOB Factory**

Item No	Description	Price
16 10 01	1 Meter Stand *	\$14,282.05
16 10 02	3 meter Stand *	\$26,201.05

* Includes anchors.

DURAFLEX® DIVING BOARDS

Duraflex's family of diving boards is the acknowledged standard for use in public facilities. From general recreational use to very high-level competition, they are the best choice for public pools.

Duraflex® Board

The standard Duraflex board tapers from tip to fulcrum and then maintains the thicker section from fulcrum to butt. This construction yields less spring than the higher competition boards but more long lasting. This is the board recommended for general recreation use. **FOB Factory**

Item No	Description	Price
16 11 01	Duraflex® 14' A = 63 1/4"	\$5507.60
16 11 02	Duraflex® 16' A = 78"	\$5821.55

Maxi-Flex® B

The Maxi-Flex Model "B" is a double tapered aluminium board for maximum spring. In addition there are approximately 200 perforations measuring approximately 1½" long and ¼" wide, extending 25" back from the tip end of the board. This feature results in an even more lively board, making it the choice of divers worldwide. For applications where dive club needs are the primary concern, the MAXI B is recommended. **FOB Factory**

Item No	Description	Price
16 11 04	Maxi-Flex® "B" 16' A = 73"	\$6714.95
