Pro Curb Edge Profile

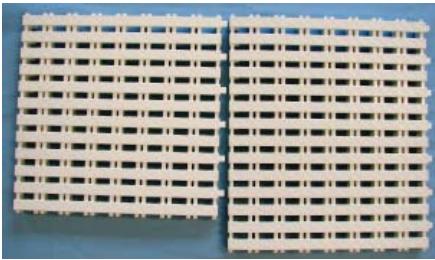

Fabricated from rigid PVC this edging will work with most grating profiles available. One leg is set up for use with one inch tall grating and one is set for 22 MM grating. It can also be supplied with slotted edge for easy use with radius trench applications. Supplied in 6 foot pieces available in white only.

Item No	Description	Price
16 32 20	Pro Curb Edging	5.00/ft.

Lawson Grating by Neptune Benson

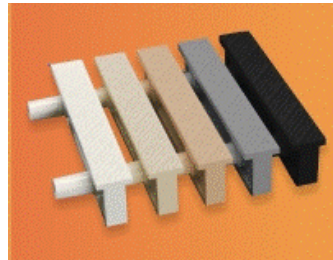

Lawson Grating makes high quality PVC Grating in two primary styles, with a wide range of sizes in each style. The material is the highest quality PVC for flexibility, strength, and UV protection. Lawson offers a 10 year warranty. The non-skid pattern has a coefficient of friction to 0.8 ASTM, the highest in the industry, and designed to be self draining to limit algae growth. Available in five standard colors, white, bone, tan, gray and black. The typical height is 1", and widths from 6" to 18" are standard. Cutting to non-standard widths, prefabricated corners, and Parallel Grating made to a specific radius are available as custom orders. Lawson Grating uses a hold down system consisting of small stainless steel clips which fit into a slot in the grating and are screwed in place every few feet for security. For pricing please let us know your height, width, lineal feet and style and we will reply with a quotation.

Duradek Grating

VIRTUALLY INDESTRUCTIBLE GRATING FOR POOL GUTTERS

Duradek grating is very well suited to use in and around aquatic centres. It is made using vinyl ester resin and a very high percentage of glass fibre; the result is the most durable grating material we have seen.

Product characteristics match requirements for use in the swimming pool environment including: corrosion resistant, non-conductive, high impact and fatigue strength, resistant to chipping and cracking, it also features an exceptional non-slip texture that is not harsh to swimmer's feet or bathing suits.

Duradek also locks each bar into place both mechanically and chemically, ensuring the bars will not ever come loose or move.

The product can be fabricated to accommodate any width of gutter. We have done applications this year with bars both perpendicular and parallel to the wall. Please call today to see if Duradek can work for your gutter; we can provide delivery, pricing, installation detail and fabrication options to help with unusual trench configurations.

Description	Price - Approximately
Duradek	\$40.00/square foot

Example: a typical 25m rectangular pool with a 14" wide trench would cost about \$12,500.00 to completely replace existing grating.

Stair Systems

Replace old degraded waterslide stairs with Duradek Stair Systems. System includes all pultruded fiberglass stair treads, side stringers and complete railings. Buy a whole system complete or just the parts you need.

Call for information, delivery and pricing.

Call with gutter detail for an exact quotation and a sample of Duradek to test in your facility.

NEW

Duradek is now available in 22MM high profile. This profile allows Duradek to fit gutters using the most common white plastic grating in the field.
