

POOL TRENCH & GUTTER GRATE PRODUCTS

Standard PVC Replacement Grating

Radius Grating 35mm High

Item No	Description	Quantity	Price
16 32 01	Radius grating 35mm H x 195mm	220	450/box \$627.00
16 32 02	Radius grating 35mm H x 245mm	221	300/box \$550.50
16 32 03	Radius grating 35mm H x 295mm	222	290/box \$603.75
16 32 04	Radius grating 35mm H x 335mm	223	250/box \$547.50

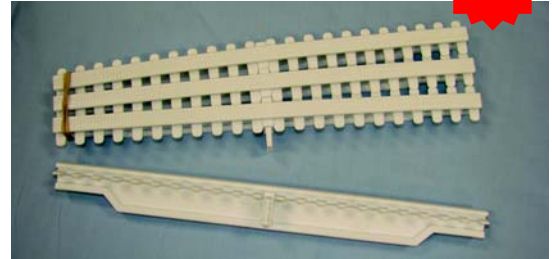

Radius Grating 35 mm High

Radius Grating 22mm High

Item No	Description	Quantity	Price
16 32 30	Radius grating 35mm H x 195mm	470/box	\$811.65
16 32 31	Radius grating 35mm H x 245mm	320/box	\$569.95
16 32 32	Radius grating 35mm H x 295mm	300/box	\$543.50
16 32 33	Radius grating 35mm H x 335mm	250/box	\$465.75

Radius Grating 22 mm High

Modular Grating

16 32 07	Modular grating 22mm H x 195mm W	212	340/box \$399.50
16 32 08	Modular grating 22mm H x 245mm W	213	305/box \$452.20

Modular Grating

Grating Tile

16 32 09	Grating tile 22mm H x 245mm W	217	52/box \$473.40
16 32 10	Grating tile 22mm H x 295mm W	218	45/box \$441.38
16 32 11	Grating tile 22mm H x 335mm W	219	38/box \$368.95

Grating Tile

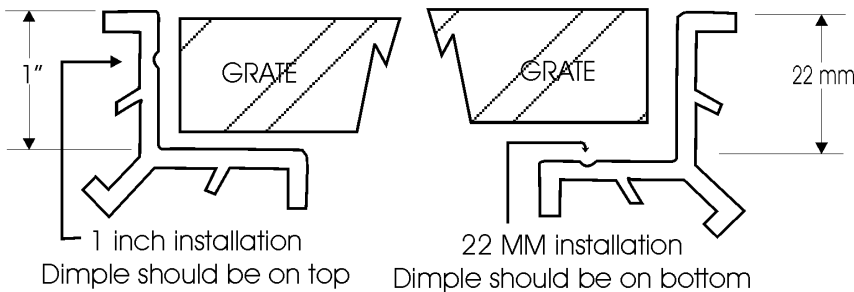

Pro Curb Edge Profile:

Fabricated from rigid PVC this edging will work with most grating profiles available.

One leg is set up for use with one inch tall grating & one is set for 22 MM grating. It can also be supplied with slotted edge for easy use with radius trench applications.

Supplied in 6 foot pieces available in white only.

Item No	Description	Price
16 32 20	Pro Curb Edging	3.30/ft.

FOR RADIUS INSTALLATION

For tight radius: field cut as shown
or
Order radius cut Pro Edge for ready out of the box installation

Saw cut every 1 to 1 1/2 inches

Indestructible replacement for Modular Grating & Grating Tile - see Duradek Grating page 82.

PVC Grating

High quality PVC grating is supplied in your choice of six colors. Fabricated from high grade, UV stabilized, outdoor quality PVC it is designed to comply with ADSTM load & deflection standards. All components are completely modular and set up to easily fasten to shoulder edge for stability. This grating is a durable very well designed product that is supported by a manufacturer's 10 year warranty.

A) PERPENDICULAR GRATING

Supplied as 'T' bars for widths of 8 to 12 inches and 'I' bar for 14 to 20 inches. This product is unique since its modular design allows it to work with straight runs as well as curved runs. This product is suitable for heavy duty use & today's freeform style gutters.

B) PARALLEL GRATING

New this year this parallel style grating is designed with integral cross bars so that it can work in same gutter as perpendicular grating without any cross bar addition to gutter!!

Parallel grating increases water flow, reduces noise and captures water more effectively than perpendicular style. In fact a 9 inch horizontal grate captures about the same volume as a 12 inch perpendicular grate. Both styles of grating have professional looking prefabricated corners available.

Duradek Grating

Virtually indestructible grating for pool gutters

Duradek grating is very well suited to use in and around aquatic centres. It is made using vinyl ester resin and a very high percentage of glass fibre; the result is the most durable grating material we have seen.

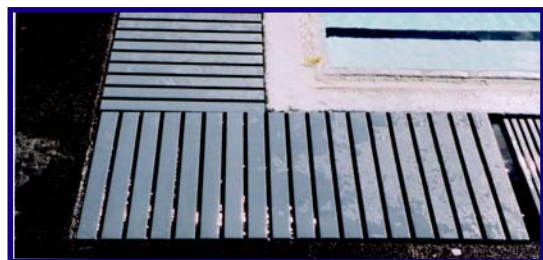

Product characteristics match requirements for use in the swimming pool environment including: corrosion resistant, non-conductive, high impact & fatigue strength, resistant to chipping & cracking, it also features an exceptional non-slip texture that is not harsh to swimmer's feet or bathing suits.

Duradek also locks each bar into place both mechanically and chemically, ensuring the bars will not ever come loose or move.

The product can be fabricated to accommodate any width of gutter. We have done applications this year with bars both perpendicular and parallel to the wall. Please call today to see if Duradek can work for your gutter; we can provide delivery, pricing, installation detail and fabrication options to help with unusual trench configurations.

Description	Price - Approximately
Duradek	\$35.00/square foot

Example: a typical 25 meter rectangular pool with a 14 inch wide trench would cost about \$11,000.00 to completely replace existing grating.

Stair Systems

Replace old degraded waterslide stairs with Duradek Stair Systems. System includes all pultruded fiberglass stair treads, side stringers & complete railings. Buy a whole system complete or just the parts you need.

Call for information, delivery & pricing.

Call with gutter detail for an exact quotation and a sample of Duradek to test in your facility!!

**Duradek is now available in 22MM high profile!!
This profile allows Duradek to fit gutters using the most common white plastic grating in the field!!**
