

AQUATIC ACCESS EQUIPMENT

Spectrum Lifts come standard clockwise rotation. Specify when ordering.

Gallatin Swim-Lift WP400 by Spectrum

The Gallatin is a Stainless Steel, water powered lift with a rated capacity of 400 pounds. The lift is ADA compliant. The standard version of this lift is designed to be used where the deck to pool floor distance is a minimum of 42". The 12" WD (water draft) version is designed to work where the pool deck to floor or bench dimension is 12" or more. This is the lift that can be customized to accommodate almost any pool or spa Deck to Pool Bottom measurement. The bases and anchors are sold separately and there are two versions of each. The short base is used where anchors are located 18" to 24" from the pool edge and the long base is used when anchors are located between 20" and 30" from the pool edge. The lift come standard with two armrests, one fixed and one flip up. Dual operating controls allow operation from the deck or from the pool. An adjustable headrest and footrest are also standard. With a five year warranty this is a great lift for new or retrofit installations.

A Measuring Guide for the Gutter and Pool Floor must accompany the order to make sure the correct base and lift modifications are incorporated. Please ask for one. Pricing is **FOB Factory**; please call for freight quotations to your facility.

Model No	Description	Price
27366	Gallatin WP 400	\$8734.00
27450	Gallatin/Lolo Preset Anchor - with lift	\$576.75

27364	Gallatin/Lolo Cover - with lift	\$412.25
20400	Water Box for new constr. - with lift	\$578.67

Lolo Swim Lift by Spectrum

The Lolo Swim Lift shares all of the same features as the Gallatin. In order to produce a very budget friendly lift the Lolo has been simplified to reduce costs. The actual differences are that the water powered lifting cylinder hangs down from the deck into the water and needs 42" of deck to pool bottom room and this dimension cannot be customized as can the Gallatin. Essentially all other lift information remains the same. **FOB Factory**

Motion Trek 350 & 400 Pool Lifts by Spectrum

The Motion Trek 350 and 400 are battery powered, ADA compliant lifts designed for installation in the concrete decks of in-ground and above-ground pools and spas. The model 350 has a 350 pound lifting capacity and the model 400 has a 400 pound capacity. Both get about 90 lifts per charge. Materials of construction are mainly 304L stainless steel. Both up and down, and rotation are powered. This lift accommodates a setback of 6" to 22" and a water draft of up to 12". Multiple anchors can be installed in any facility and with the optional transport cart the lift is easy to move. The lift comes with 1 anchor, 1 watertight, hardwired handset, battery and charger, footrest, armrests, and seat belt.

153607	Extra Replacement Battery	\$453.15

NOTE: Can be ordered without footrest for spas.

Lifts and wheelchairs are HST, GST and PST Exempt.

This is Spectrum's portable lift and it is an excellent lift for retrofit into existing pools. The Traveler's innovative design works well for both the typical profile of a main pool and that of a swirl pool/hot tub. One Traveler can fulfil all of a facility's access lift requirements and Traveler is light and easy to move between locations by one lifeguard, if the cart is used.

The Traveler works with an anchor in the deck and is moved between locations on a dedicated cart. The Traveler meets all the access requirements under US ADA guidelines including a 500# lift rating and controls accessible by both user and attendant. A rechargeable DC battery supplies power.

Fabrication is 100% stainless steel and the Traveler is supported by a 5 year manufacturer's warranty.

The Traveler XRC has wireless controls and includes the headrest and outer arm as standard equipment.

TRAVELLOR ANCHOR

New Pal 2 Lift by SR Smith

This lift is essentially the same as the Pal-Portable except to reduce costs the weights are now concrete. As concrete is less dense, the weight stack is longer, making this 11" longer than the Pal-Portable. All the plastic parts in the PAL 2 are colored Gray Mist to help differentiate between the models. All the mechanical parts are the same except on the PAL 2 the battery and control box are now located higher up on the mast to reduce wetting.

FOB factory.

New Lift Operator Control System by SR Smith

This unit is standard on all new SR Smith Lifts. As a Retrofit Package it consists of the mounting bracket, the Lift Operator, (Relay Box), a new battery, and a new charger. It offers an Emergency Stop Button, a second set of Motion Controls, the Optional Key System, Battery Level indicator and Emergency Alert LED. It has the same sockets as the existing old style units and the existing controls and power wires to the motors simply plug into the same spots on the new unit. The new Lift Operator is backwards compatible with all SR Smith Lifts and other lifts using Linak controls.

Splash Pool Lift by SR Smith

This lift is designed to be used in a deck anchor, but can be removed as required or used at multiple locations with extra anchors. The normal lift has a 400 pound weight limit. Materials of construction are stainless steel and aluminum, all powder coated. The standard lift includes the stainless steel anchor c/w cover, battery c/w charger and cover, waterproof control, footrest, armrests and seatbelt assembly. Rotation is 360 degrees. The new Lift Operator Control System is standard. This lift can be customized (quoted on request, dimensions needed) for use in extended reach or height situations but the weight limit is reduced to 300 pounds by this. **Pricing is FOB Factory.**

Model No.	Description	Price
300-0000	Splash w/armrests & Anchor	\$7127.15
400-0000	Caddy when ordered with lift	\$705.82
300-6200L	Square Anchor w/cap when ordered with lift	\$344.98
900-5000	Lift Available Sign when ordered with lift	\$86.10
920-5000	PAL / PAL 2/ Splash Cover	\$759.65

Lifts and wheelchairs are HST, GST and PST Exempt.

Pal-Portable Aquatic Lifts by SR Smith

The Pal-Portable can be used anywhere by wheeling it into place, locking the castors and setting the outrigger supports. No anchors required. The weight stack in the unit provides the counterbalance for a 300 pound capacity. The PAL is self-powered and uses a rechargeable 24 volt DC battery, with a waterproof case, normally good for about 30 use cycles. The control bar is also waterproof and accessible by the user or an attendant. The PAL is designed for use in pools where all pools are at deck level, and the PAL Hi-Lo has extra reach for facilities where the Hot Tub is raised above deck level. The PAL SPA is a unit for above ground Pools and Spas up to 48" above deck level. PALs come with battery, charger, console cover, waterproof control, footrest, and seatbelt assembly. Comes knocked down for shipping, some assembly is required. Note shipping weight is about 1,100 pounds. Pricing is **FOB Factory**, please call for a freight quote to your destination.

Item No	Description	Price
200-0000	PAL-Portable Aquatic Lift with armrests	\$10,178.40
250-0000	PAL Hi-Lo with armrests	\$10,404.65

1001495	Spare Battery (new style)	\$403.45
920-5000	PAL Cover	\$759.65
100-1600	Replacement Hand Control - 4 button	\$248.64
200-2000	Replacement Castor - Rigid	\$91.25
200-3000	Replacement Castor - Swivel & Brake	\$128.28

MultiLift by SR Smith

This is a new lift, designed to be practical. This means low in cost, easy to install and simple to maintain. This unit is rated at 350 pounds and designed to be bolted at one location. The setback range from pool edge is 12.5" - 17" and the maximum deck to water height is 8". The lift is supplied, with or without anchors, and armrests are optional. This lift features a flange mount with 4 anchor bolts, right or left seating, and powder coated stainless steel and aluminum construction. The new SR Smith Lift Operator Control System (see next catalogue page) is included with this lift. Note that a Deck Profile Drawing will be required with order and if there is in-deck grating it needs to be shown. Custom mounting plates to span grating quoted and made to order if required. **FOB Factory:** Please call for a freight quote to your destination.

Item No	Description	Price
575-0000	Multilift w/ anchor and armrests	\$4659.75
575-0105	Multilift w/ anchor, armrests & folding seat	\$5385.80

WITH OPTIONAL ARMRESTS

Revolution Lift by Aqua Creek

A great lift, loaded with features at a great price. This lift is easy to install. It uses a single anchor (included) which must be cemented into the deck, and can accommodate 10" - 40" of setback. The load rating is 500 pounds and this lift can clear a 30" high wall. The lift is battery powered and comes with a full 360 degree powered rotation in both directions. Construction is stainless steel, powder coated white. The lift comes with dual flip-up arm rests and a removable or adjustable foot rest. Options include a headrest, cover and spare battery. A heavy lift, not easily moveable. **FOB Factory.**

Model No	Description	Price
17 23 15	Revolution Lift w/ anchor	\$7495.00
17 23 16	Revolution Cover	\$375.00
17 23 17	Revolution Headrest	\$320.00

17 23 20	Transport Cart - when ordered with lift only	\$1787.10
17 23 21	Wheelchair Picker (24" wheelchair included) When ordered with lift only	\$3095.00

Lifts and wheelchairs are HST, GST and PST Exempt.

ACCESS STEPS & LADDERS

Therapy Ladder (Missoula ladder) by Spectrum

The sloping design makes pool access user friendly at a very good price. Rails are stainless steel 1.5' OD for easier gripping. Units are custom made for your pool. Anchor sockets and escutcheons sold separately. **FOB Factory.**

Model No	Description	Price
25013	Therapy Ladder 3 step	\$1986.75
25019	Therapy Ladder 4 step	\$2103.30
25025	Therapy Ladder 5 step	\$2336.40
42696	Compression Anchor - composite	\$127.20
24094	Compression Anchor Wrench	\$111.30

This Therapy Ladder can be configured to work in deep water by being bent to return to the pool wall like a regular pool ladder.

Boseman Ladders by Spectrum

These ladders are made with 1.5" tubing so the handrails are easy to grip and the treads are heavy duty fiberglass with a non-skid finish. They require 1.5" wedge anchors cemented in the deck for mounting just like regular ladders so will only fit in the anchor location, but can be removed if required. Anchors and escutcheons not included, must be ordered separately. Custom made to your pools required dimensions. **FOB Factory**

Item No	Description	Price
57920	3 step Boseman	\$6275.30
57921	4 step Boseman	\$7127.55
57922	5 step Boseman	\$7841.40

Easy Ladder

These Ladders are custom made fiberglass pool ladders, designed for use where temporary extra access is required. Construction is one piece, with integral sides and risers. The Deck adapter is bolted on. They are designed to sit on the pool bottom and deck, snugly, and no extra anchoring is provided. The steps are 31" wide, riser height is 9 3/4" and tread width is 12", and non-skid. The ladder comes with a detachable set of wheels to make moving easier. Both corner and end wall models can be made. Three colours are available, yellow, light blue or medium blue. Ladders are custom made to dimensions provided, and trimmed to fit depth, floor slope, and coping as required. Some assembly is required. Handrails are stainless steel. Normally 2 people are needed to lift the ladder out of the pool. Dimensions noted are from pool bottom to deck level. **FOB Factory**

Item No	Description	Price
17 06 01	Easy Ladder, 32" to 48" 5 step	\$5321.35
17 06 02	Easy Ladder, 48" to 58" 6 step	\$5854.40
17 06 03	Easy Ladder, 59" to 68" 7 step	\$6840.50
