

SCHOOL OF POOL & SPA CHEMISTRY
Div. of Chem-Aquascience, Inc.

core water chemistry course

We've taken our past student's comments into consideration when updating Lowry School's Core Water Chemistry course. The in-class course will have a more hands on approach to pool and spa maintenance and includes the following subjects:

- 💧 **Basic concepts of pool water maintenance**
- 💧 **Water balance, testing methods and adjusting procedures**
- 💧 **Communicable diseases & CT values**
- 💧 **Chlorine and bromine sanitation, testing methods and adjusting procedures**
- 💧 **Alternative sanitizers**
- 💧 **Hot Water Chemistry**
- 💧 **Filtration and Circulation**
- 💧 **Province-based pool & spa operators**
all educational requirements for pool and spa operators

Certification: Upon completion of this course, attendees will receive a certificate of certification. This degree is proof of the knowledge necessary to be a certified pool and spa technician in any province of Canada.

Learn from the best

Our instructors are independent industry professionals with many years of experience and bring a unique perspective on the events that shape the pool and spa industry.
