

COMMERCIAL HI RATE SAND FILTERS

REPLACING ? UPGRADING? OR NEW SYSTEM? WE CAN HELP !!

Commercial Aquatic Supplies can provide product and price information for your application. We can also make product recommendations to suit your facility - Call for assistance with both equipment replacement or upgrades, as well as new systems.

To receive an equipment or system quotation, provide us with your present equipment specifications, pump size, pool capacity and any relevant physical criteria (space, doorways, etc.). We will be happy to provide a quotation complete with equipment specifications.

Miami High Rate Sand Filters

Want good water quality, then these are your filters! Miami filters feature 36" of sand depth for the best filtration obtainable from sand filters. Internal piping and laterals are schedule 80 and heavy duty, to eliminate lateral changes, and digging up all that sand. The under drain assembly is a special design, (patented), to ensure proper circulation through the whole tank, to eliminate septic conditions due to stagnant spots, (unchlorinated), inside the lower tank. The tanks are filament wound fibreglass for strength, and polyester lined for corrosion and abrasion resistance. All tanks are NSF 50 approved, and have a 16" man-way for service access, a 4" media dump port, and a ¾" screened water drain. These filters are rated at 15 gallons per square foot per minute, but we recommend 10-12 USGPM for optimal performance. Filter shown at right includes optional face piping. They are supplied with a gauge panel, and sold FOB factory.

Due to oil, prices subject to change without notice. Please call.

PAC FAB Triton II Sand Filters

Pac Fab's Triton fibreglass filters are rated for public pool use and are easily adaptable to multi unit installations. Tritons are commonly used on Whirlpools, Tot Pools, and smaller Institutional Pools. This filter offers the best price point for a fibreglass commercial filter.

Key advantages of Triton Filters include: it is a proven filter (with literally thousands of installations in place), parts are readily available (and reasonably priced), and Tritons are straightforward to work on. Filters are supplied complete, only the filter media needs to be ordered separately.

Specification sheets are available. Pac Fab also makes 'commercial' & 'heavy-duty' versions of the Triton.
