

PLASTIC BENCHES

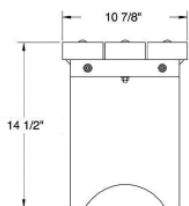

These plastic benches are made from recycled plastic that has been made into plastic lumber. The benches are similar to their wooden look alike, but are impervious to almost everything, especially pool chemicals, and never need painting. They come partially knocked down, some assembly required, and all fasteners are stainless steel. Only two colours, grey or light brown are available. Custom lengths are also available, and will be priced the same as the next larger regular size. **FOB Factory.**
