

TEST KITS AND CHEMICALS

Taylor Is Your Best Choice

Taylor Technologies has been developing, manufacturing and selling analytical test kits since 1930. They are very focused on supplying test kits that are absolutely reliable, functional and easy to use. **Labelling and MSDS sheets are DOT compliant.**

In aquatics, Taylor is the kit most often used by pool operators, health department officials and maintenance personnel. With kits available for all the tests typically done at commercial pools.

At Commercial Aquatic Supplies we've carried only Taylor for more than 20 years. We carry a complete stock of Taylor kits and reagents. We also have the expertise to assist with chemistry or testing questions as they arise.

LaMotte ColorQ Pro 7 Test Kit

No color matching, just fill the test tube, add the reagent, mix, insert into the comparator and read the results on the digital display. This kit tests for Free Chlorine, Total Chlorine, Ph, Alkalinity, Calcium Hardness and Cyanuric Acid. Please note; if you drop the electronic comparator and it breaks you need to buy a new test kit. Also the reagents are not strictly Canadian Compliant; They are not bilingual, and no hazard symbols are available on the labels.

Myron L Company Electronic Testing Pens

Myron makes 2 Testing pens, the PT2 which tests for pH and Temperature, and the PT3 which tests for ORP and Temperature. Both of these operate by turning them on, dipping into the pool or water sample, waiting for the reading to stabilize (typically 10-30 seconds), then reading the results from the digital display. Automatic temperature compensation, auto ranging and batteries included. Both are waterproof, accurate and have replaceable sensors. Please note that the sensor tips are glass, and will break if dropped on the pool deck when in use. Care is required in use.

Acid Magic

Acid magic has all the strength of standard muriatic acid but less of the harmful effects. Specifically it fumes 90% less, and is much slower to burn if splashed on skin, thanks to the revolutionary blend of proprietary ingredients. It replaces regular Muriatic Acid for PH and Alkalinity adjustment, acid washing, cleaning filters and controller electrodes. Like regular acid, Acid Magic needs dilution when used for PH correction, (so Alkalinity is not reduced at the same time) and is used full strength to reduce Alkalinity.
