

REPLACEMENT STRAINERS

Custom Fibreglass & PVC Strainers

Our custom strainers are suitable for both new installations and replacement of older strainers. Custom strainers really save time and money for replacement applications since each one can be built to fit existing plumbing. Strainers are supplied with: Vanstone flanges for inlet and outlet connections, an extra long basket to extend run between cleanings, air bleed valve and clear lid. These have worked very well replacing old Hayward and Jacuzzi cast iron strainers as they rust out.

Custom Heavy Duty Fiberglass and PVC strainer

Inlet & outlet can be straight through or offset as required to match existing plumbing.

Ordering A Custom Strainer:

Fabricating a strainer to fit existing piping requires just three measurements plus flange sizes for each side. When you place an order we'll fax a diagram with dimensions to be filled in. If fitting existing plumbing is not a consideration, a standard strainer can be started without any additional information.

Nemato Strainers
