

Aquatic Wheel Chair (Stainless Steel)

Our aquatic wheelchair is designed for use in shower areas on the deck and even in the pool. It works with a lift or a ramp to provide facility access from the change room to pool deck and back. An aquatic wheelchair eliminates one more barrier for use of aquatic centres.

USERS APPRECIATE

The wheelchair is most similar in style and function to a traditional wheelchair.

OPERATORS APPRECIATE

The low maintenance design and durability.

All chairs are fabricated from materials 100% compatible with swimming pool water. These chairs are suitable for daily immersion in swimming pool water.

Wheelchairs will fit thru a door opening if it is 8" wider than the seat width shown.

These heavy duty wheelchairs are rated at 350 pounds for the 18" thru to the 22" sizes, and the 24" is rated for 400 pounds. All the stainless steel frames are a double cross braced frame and fold up for shipping and storage. The frame tubing is bent to eliminate sharp corners, the front and rear wheels are plastic mag type with nylon bearings and the tires are foam filled so no flats. The upholstery fabric is a mesh for draining and treated to prevent mold. The armrests are removable for easy transfers. All the chairs come with a seat belt with a buckle. Chest straps with Velcro are available as an option. Order by seat width.
