### Myron L Company Electronic Testing Pens

Myron makes 2 Testing pens, the PT2 which tests for pH and Temperature, and the PT3 which tests for ORP and Temperature. Both of these operate by turning them on, dipping into the pool or water sample, waiting for the reading to stabilize (typically 10-30 seconds), then reading the results from the digital display. Automatic temperature compensation, auto ranging and batteries included. Both are waterproof, accurate and have replaceable sensors. Please note that the sensor tips are glass, and will break if dropped on the pool deck when in use. Care is required in use.
