POOL SLIDES

Designed and manufactured for public pools, these slides are suitable for new pools or retrofit projects, inside or outside applications.

The frame and flume supports are made from powder coated steel and the flume is made from LDPE. All slides come with accommodations to connect to pool circulation or freshwater supplies.

All slides require 5 gallons of water per minute per slide for adequate flow down each flume.

A variety of configurations including single flume, double flume or quad flume are available to suit your available deck space and other facility considerations.

A low voltage DC gutter mounted pump can be supplied if other water sources are unavailable.

Pricing starting at \$35,000 for single flume styles

Does not include installation or assembly. Due to variations in local health codes, obtain approvals before ordering this item. Installation service provided by manufacturer.
